About This Game

Play as the zombies!

Infect and Destroy is an indie game in which you play as an infectious disease with the sole purpose of eliminating everyone on Earth. Play as an ultra-intelligent self-aware virus capable of reanimating the dead and turning them into your minions. Spread amongst the globe, infecting and reanimating all those who stand in your way.

Features

- **Play as the disease** - Experience an interactive and non-linear sandbox campaign in which you take control of a zombie plague the likes of which never seen before by mankind. Major cities and locations from around the globe are ready for your terror and carnage.
- **You are the horror** - Evolve and mutate your virus, spawn special types of zombies, invoke city-wide disasters and send the humans fleeing for their miserable doomed lives. You are the one who decides when it is time to scream and when it is time to die.
- **Expand your reign of fear** - The entire world is your breeding ground. Infect abandoned buildings to turn them into hives, setting up your base of gruesomeness as you go along. Traps, spawners and terrifying organic structures are all at your disposal.

-
- **Adapt to survive** - The humans will do all in their power to stop your tyrannical plague. Quarantines, military strikes, evacuations, vaccinations, nukes and more will all be used with hopes of stopping their inevitable extinction.
 - **Huge game worlds** - All confrontations and infections take place in realistically sized scenarios. Your hordes will have to cross swamps, forests, mountains and more to cure their insatiable hunger.
 - **Affect the world around you** - Take out power stations to cause blackouts, infect water distribution supplies, ruin food stockpiles, cause riots and more, thus causing the human race to crumble from within.
 - **Co-Op and Versus Modes** - Players can aid each other by playing as the Conniption virus, or else test their mettle against one another in epic humans versus zombies confrontations.
 - **Pop-In Pop-Out** - The player can take control of individual zombies and infected for a truly immersive and personalized experience. Use stealth to take special infected behind enemy lines or charge and pummel through military front lines.

30+ hours.. Lots of possibilities.. Great fighting style.. great leveling system.. good story.. Bad ending.. 8 of 10... Good inspiration.I like it.. These items are already available in the game, just the coloring is different. As another reviewer stated, the armor items wear out and cannot be repaired, quickly rendering it useless. The weapon is inferior to most others available in the vanilla game, and there are mods that can get you better for free.

A complete waste of time and money.. So far I like the game overall. What I don't like is that each action resets your position to the starting point, instead of just let you turn to look around freely. It's a 3D environment, after all, this should be an option IMO. I'm currently stuck in the part when you have to run for your life, it's super hard. Like it's meant for you to die on the run. So it's kinda hard for me to rate this game at this stage but I'll go with a recommended. I will play more and let you know if my rating holds.. Love it, I'd actually dated both sisters....

Pros:

- More Dirt Rally, my favorite driving game
- New stages look great, psyched on the New England and New Zealand spots
- Surface modeling is still peerless compared to other games
- Sound FX are immaculate
- Feels great to go flat out

Cons:

- the new UI / Menu System SUCKS. It takes forever to find what you want, you have to hover over each component to see its damage condition, the new repair system is vague, I have no idea whether my progress in a championship is saved or not before I quit.
- always online for single-player is garbage

Giving a thumbs up because it still FEELS better than 99% of racing games, but theres a lot of careless decisions on the system level that feel like a step back.. It's Diner Dash with Zombies & Monsters. What not to love about that..

1. Мне понравилась графика

2. Вроде бы сейчас и подвижной состав ведёт нормально себя) В плане пошатывания кабины

3. И миссий много

вообщем подводя итог хочу сказать что игра мне понравилась)!! 6/10 ok not really good. My Lovely Daughter was bought for me by my girlfriend and while I don't spend much time on it, it does have an enthralling plot you can unlock! Along with so many "cute" designs for daughters, it really does make for a fun game..

This DLC probably took about 30 hours to complete.

US Corps 44-45 was my final DLC to play through. It was a solid affair and it is really difficult taking on some of those superior Axis armour units. All in all, a fine DLC that ends with a massive hypothetical slugfest taking on the Russians after Berlin falls.

DLC 7V10 - Not as good as Soviet Corps or the hypothetical Sealion.

I've now completed every Panzer Corps DLC, including the full Grand Campaign. I've clocked up over 500 hours on Steam, although I started the Grand Campaign before it was even released on Steam. Slitherine did a great job allowing owners of the original boxed game port their game and purchased DLC into the Steam library.

Overall, I love playing Panzer Corps, but I will put it aside now as I eagerly await the release of Panzer Corps 2. I'll finally also have a change to try out Order of Battle.. This game has a lot of potential. Hopefully will be developed in the future.

Art style reminds me good old Warcraft 3. Gameplay is pretty nice and simple. Probably would be successfull as a mobile game. I would introduce some simple character progression to add more depth during the matches.

. I passed the first surgery, but can't move on to more! I've tried reinstalling, checking the original install, but nothing helps. I thought this was the full game, not just a trial game! WTF!?
